

## A Learning Place A Teaching Place Student Tracking and Reporting

### 3. **Student Tracking and Reporting** – on site, subscription by Individual Teacher, School-Multiple, or Code

Student Tracking and Reporting allows teachers to track their students' understanding across all Concepts and Levels K-6, access a class spreadsheet (currently downloads as a CVS file but I am open to your suggestions) and access an individual report of each student (currently downloads as a PF but I am open to your suggestions).

Included in Complete Teaching Resources Package - Individual Teacher monthly or annually auto renewing, School-Multiple as part of an annual subscription, manual renewal, or Code that was created by us, or that is generated as part of the School-Multiple subscription.

Also can be individually subscribed to - Individual Teacher monthly or annually auto renewing, School-Multiple as part of an annual subscription, manual renewal, or Code that was created by us, or that is generated as part of the School-Multiple subscription.

## A Learning Place A Teaching Place Student Tracking and Reporting

Currently the Tracking and Reporting looks different for the School-Multiple Subscriber, for a Teacher Registered as part of a School-Multiple Subscription, and for an Individual Teacher Subscriber.

### The School-Multiple Subscriber can

- link each Teacher (who registered as part of the school subscription using a Code) to their class.
- link multiple teachers to the same class.
- link a teacher to multiple classes
- unlink a teacher from a class
- change the name of the class
- see whether a teacher has access the site in the past 3 months

This is what it currently was designed to look like:

Registered Teachers' Names	Select here to create classes and to assign teachers to a class.	Teacher is assigned to this class.	Select here to unassign teachers from a class.	Teachers who have access the site in the past 3 months.
Carol Spencer	<input type="button" value="Link teacher to class ▾"/>	1C	<input type="button" value="Unlink teacher from class ▾"/>	X
Mary Smith	<input type="button" value="Link teacher to class ▾"/>	1C ▾	<input type="button" value="Unlink teacher from class ▾"/>	✓

I am completely open to your suggestions.

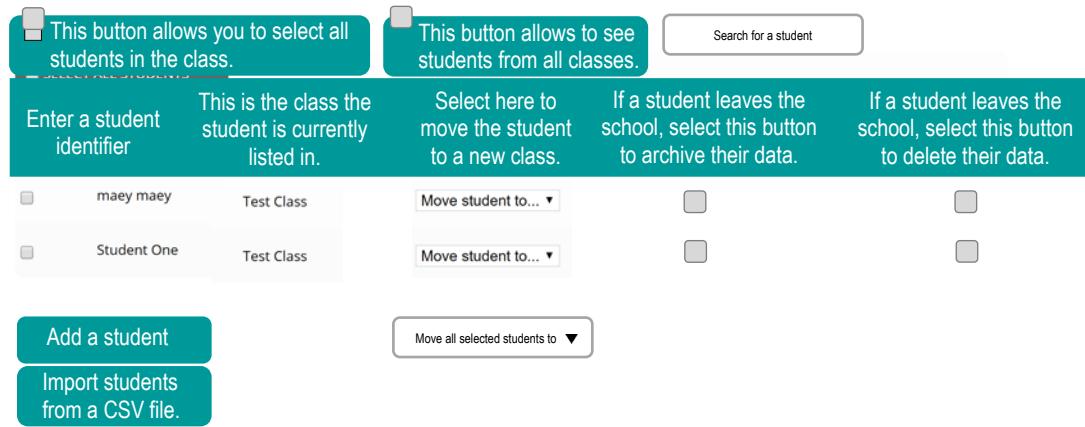

### The School-Multiple Subscriber can also

- add students to each class, either by typing in one at a time, or by importing a CSV file.
- change the name of a student
- move 1 / some / all students to a new class.
- when a class is empty, it disappears.
- archive students who have left the school.
- delete students.
- re-order students.
- search for a student.

(NB: Teachers linked to a class can also do this for the class/es they are linked to only.)

## A Learning Place A Teaching Place Student Tracking and Reporting

This is what it currently was designed to look like:

The screenshot shows a user interface for managing student data. At the top, there are two teal-colored callout boxes with white text and icons. The first box on the left contains a checkbox icon and the text: "This button allows you to select all students in the class." The second box on the right contains a checkbox icon and the text: "This button allows to see students from all classes." To the right of these boxes is a search bar with the placeholder text "Search for a student". Below this header, there is a table-like structure with five columns. The first column is labeled "Enter a student identifier" and contains a text input field with the value "maey maey" and a dropdown arrow. The second column is labeled "This is the class the student is currently listed in." and contains a text input field with the value "Test Class". The third column is labeled "Select here to move the student to a new class." and contains a dropdown menu with the option "Move student to... ▾". The fourth column is labeled "If a student leaves the school, select this button to archive their data." and contains a checkbox. The fifth column is labeled "If a student leaves the school, select this button to delete their data." and also contains a checkbox. Below this section, there are two rows of student data. The first row has a checkbox, the name "maey maey", and the class "Test Class". The second row has a checkbox, the name "Student One", and the class "Test Class". Each row also has a "Move student to..." dropdown. At the bottom left, there are two teal buttons: "Add a student" and "Import students from a CSV file.". At the bottom center, there is a button labeled "Move all selected students to ▾".

I am completely open to your suggestions.

## A Learning Place A Teaching Place Student Tracking and Reporting

Currently the Tracking and Reporting looks different for the School-Multiple Subscriber, for a Teacher Registered as part of a School-Multiple Subscription, and for an Individual Teacher Subscriber.

**After the School-Multiple has linked the Teacher to a class, the Individual Teacher who Registered with a Code as Part of a School Subscription can:**

- add students to each class, either by typing in one at a time, or by importing a CSV file.
- move 1 / some / all students to a new class.
- when a class is empty, it disappears.
- archive students who have left the school.
- delete students.
- re-order students.

(NB: School-Multiple can also do this for all classes.)

This is what it currently was designed to look like:

<input type="checkbox"/> This button allows you to select all students.				
Enter a student identifier	This is the class the student is currently listed in.	Select here to move the student to a new class.	If a student leaves the school, select this button to archive their data.	If a student leaves the school, select this button to delete their data.
<input type="checkbox"/> maey maey	Test Class	<input type="button" value="Move student to... ▾"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Student One	Test Class	<input type="button" value="Move student to... ▾"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="button" value="Add a student"/> <input type="button" value="Import students from a CSV file."/>		<input type="button" value="Move all selected students to ▾"/>		

I am completely open to your suggestions.

Once classes have students listed in them, when the School-Multiple Subscriber selects Student Tracking and Reporting, they select the class they want to see from a list of classes.

They can also select to see all students. In this view the students are listed in classes, from Kindergarten to Year 6. When selecting to see all students, the School-Multiple Subscriber can search for a student by Student Identifier.

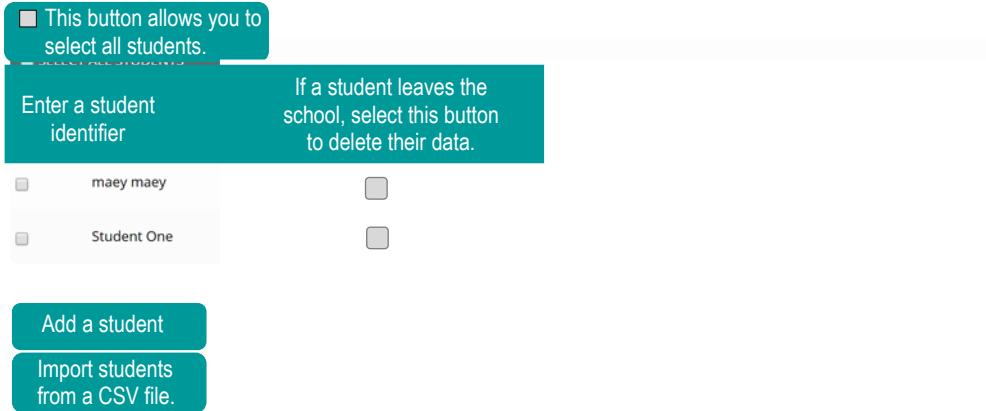

## A Learning Place A Teaching Place Student Tracking and Reporting

Currently the Tracking and Reporting looks different for the School-Multiple Subscriber, for a Teacher Registered as part of a School-Multiple Subscription, and for an Individual Teacher Subscriber.

### An Individual Teacher Subscriber can:

- add students to their class, either by typing in one at a time, or by importing a CSV file.
- delete students.
- re-order students.

This is what it currently was designed to look like:

The screenshot shows a user interface for managing student data. At the top, there is a teal header bar with white text. On the left, it says "Enter a student identifier". On the right, it says "If a student leaves the school, select this button to delete their data." Below this is a table with two rows. The first row has two columns: the left column contains a checkbox and the name "maey maey", and the right column contains a checkbox. The second row has two columns: the left column contains a checkbox and the name "Student One", and the right column contains a checkbox. At the bottom of the interface are two teal buttons: "Add a student" and "Import students from a CSV file."

This button allows you to select all students.

Enter a student identifier

If a student leaves the school, select this button to delete their data.

<input type="checkbox"/>	maey maey	<input type="checkbox"/>
<input type="checkbox"/>	Student One	<input type="checkbox"/>

Add a student

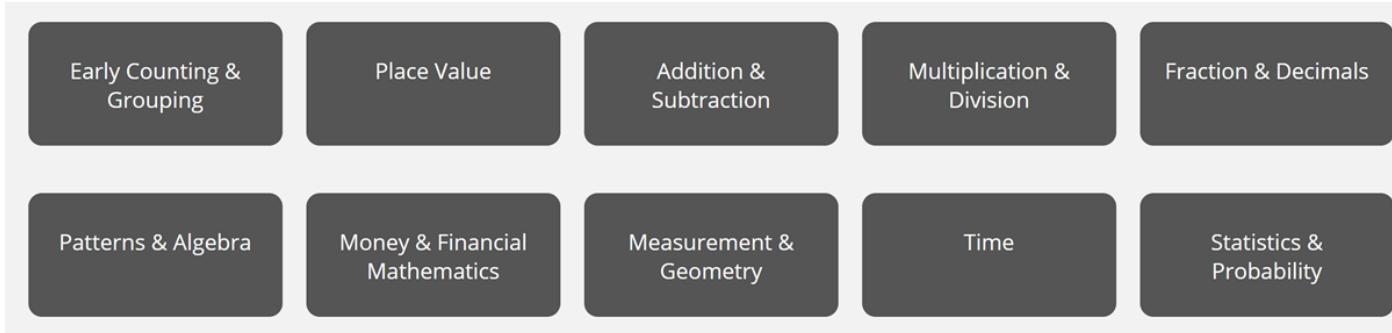

Import students from a CSV file.

I am completely open to your suggestions.

## A Learning Place A Teaching Place Student Tracking and Reporting

Once the class has been set up and has students in it, the teacher can begin tracking the student's understanding.

Currently this involves selecting a Concept.

The Concept with all of the Levels from the Teaching Resources shows up on the next page.

These show the colour of each grade.

These Levels are the same as the Levels on the Teaching Resources. When a number is moused over, the Level description appears. When a cell is moused over, the Level description appears.

The Students in the class are listed here.

KINDERGARTEN / PREP / RECEPTION
YEAR 1
YEAR 2
YEAR 3
YEAR 4
YEAR 5
YEAR 6

PLACE VALUE - CONCEPT LEVELS									
1	2	3	4	5	6.1	6.2	6.3	7	8
9.1	9.2	10							

Lili Put

✓ = Student has demonstrated understanding  
□ = Student is working towards understanding

CLASS REPORT

Click to download a spreadsheet of your students' current levels of understanding across all concepts.

[GO BACK TO CONCEPTS](#)
[GENERATE CLASS SPREADSHEET](#)
[DOWNLOAD ALL STUDENT REPORTS](#)

Selecting the number at the top of a column, moves every cell up one level: An uncoloured cell becomes coloured. A coloured cell becomes ticked. A ticked cell remains as it.

Related concepts are coloured / ticked / uncoloured simultaneously – see page 8 for explanation.

Scrolling over cells in a row, moves every cell up one level: An uncoloured cell becomes coloured. A coloured cell becomes ticked. A ticked cell remains as it.

Currently a spreadsheet may be downloaded with cells coloured or ticked just like on the screen.

An individual student report for each student / class of students made be downloaded, currently as a PDF, – see sample on page 7.

## A Learning Place A Teaching Place Student Tracking and Reporting

Selecting a student's name opens a profile of their understanding.

Cells can still be selected here in the same way as they can be on the class tracking page.

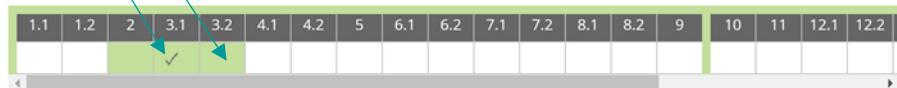

### STUDENT PROFILE

Lili Put

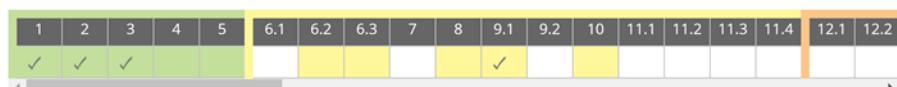

Class: New Clas Test

Select grades from the buttons below. To edit a student's understanding, please click the concept name to go to the concept tracking page.

#### Early Counting & Grouping

#### Place Value

#### Addition & Subtraction

An individual student report can be downloaded, showing last 3 concept Levels ticked, and next 3 yet to be ticked, currently as a PDF, for an individual student in this view. The entire class's Individual Student Report may be downloaded in a single PDF.

Student Name Class Date Report was downloaded.	
(student's name) has demonstrated understanding of      (student's name) is developing understanding of	
<b>Place Value</b>	
<b>Place Value 9</b> .1 Friends of 20 through addition. .2 Friends of 20 through subtraction.	<b>Place Value 12</b> .1 Explain counting forwards by 10s on the decade. .2 Explain counting backwards by 10s on the decade. .3 Explain counting forwards by 10s off the decade. .4 Explain counting backwards by 10s off the decade.
<b>Place Value 10</b> Friends of any decade, through addition and subtraction	<b>Place Value 13</b> Partition tens numbers.
<b>Place Value 11</b> .1 Standard place value of two-digit numbers. .2 Non-standard place value of two-digit numbers. .3 Partition two-digit numbers using standard and non-standard place value and non-place value. .4 Read and order two-digit numbers using place value.	<b>Place Value 14</b> Identify friends of any 100, through addition and subtraction.
<b>Addition and Subtraction</b>	
<b>Addition and Subtraction 6</b> Jfnqpinckm hauipn oufhpicn	<b>Addition and Subtraction 13</b> Gfyeihsj uhfed uhedjiwo

## A Learning Place A Teaching Place Student Tracking and Reporting

Related concepts are coloured / ticked / uncoloured simultaneously

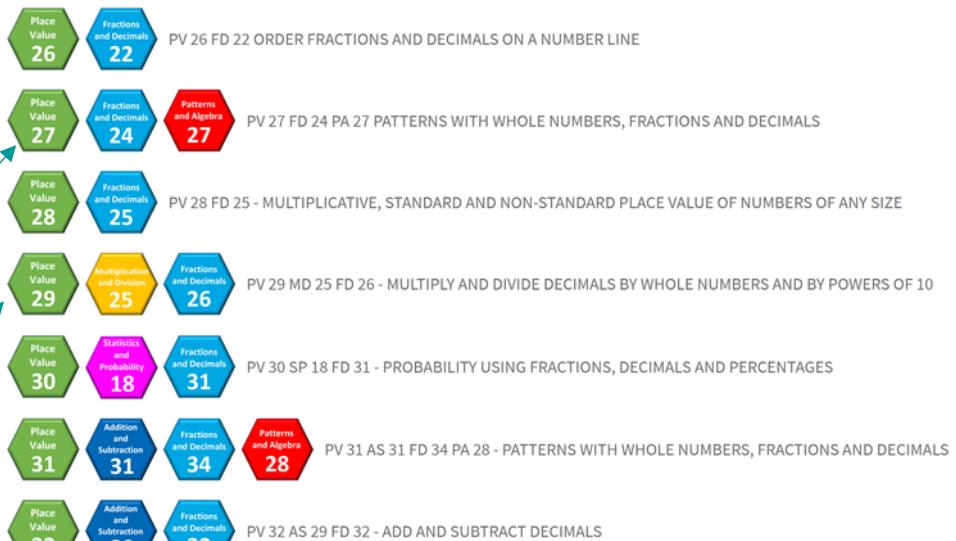

You can see from this image that some Concept Levels are related:

In the Student Tracking and Reporting, if one Concept Level is coloured / ticked / unticked, all related Concept Levels are automatically coloured / ticked / unticked.

For example, if Place Value 27 is coloured, then Fractions and Decimals 24, and Patterns and Algebra 27 are also coloured.

For example, if Place Value 29 is ticked, then Multiplication and Division 25, and Fractions and decimals 26 are also ticked.

For example, if Place Value 32 is then un-ticked, then Addition and Subtraction 29, and Fractions and decimals 32 are also un-ticked.

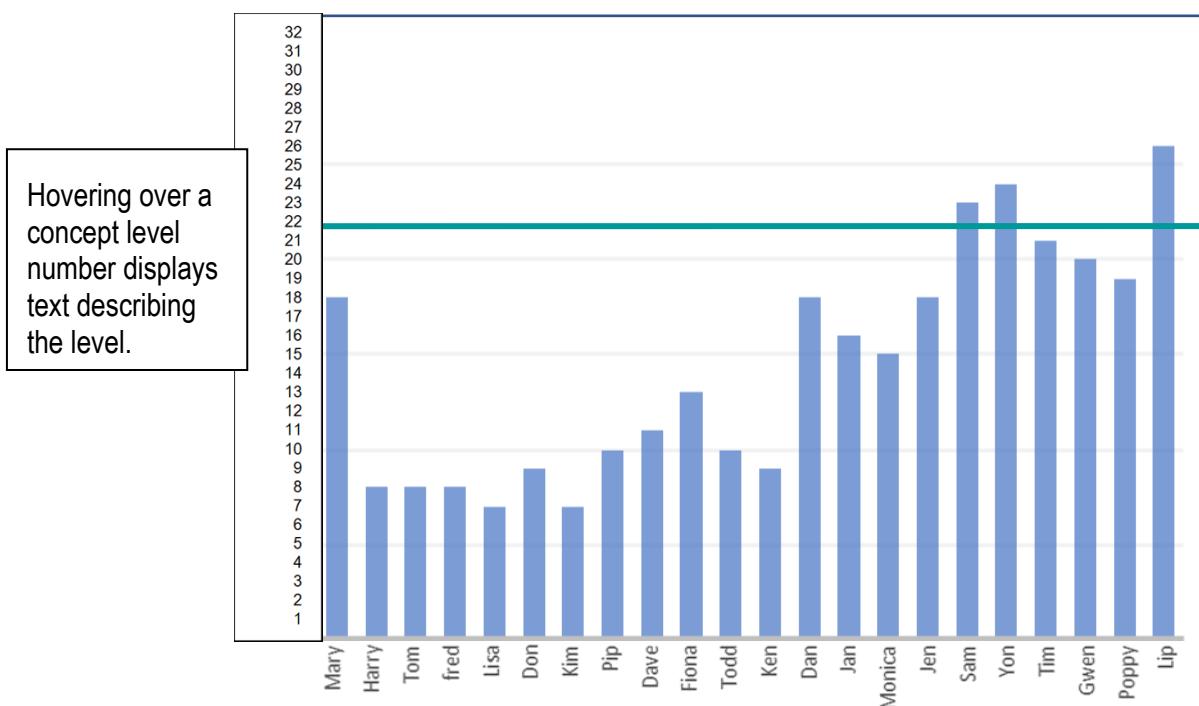

## A Learning Place A Teaching Place Student Tracking and Reporting

New functionality I'd like:

As well as being able to download a report / spreadsheet for a selected student,

- Download a report / spreadsheet for a selected class.
- Download a report / spreadsheet for a selected group of classes.
- Download a report / spreadsheet for a selected grade.
- Download a report / spreadsheet for a selected group of students.
  
- Create a graph with line for grade level for a selected class for a single Concept.
- Create a graph with line for grade level for a selected group of students for a single Concept..
- Create a graph with line for grade level for a selected group of classes for a single Concept..

For example, Place Value – Green Line is Year 4 Grade Level

- Create a graph with line for grade level for a selected individual student across all Concepts, for example, Mary.
